History of the Common Council of the City of Indianapolis

Indianapolis was established as a town in 1821. It was at this time that a commission, appointed by the legislature, selected this location as a site for a seat of government of the State of Indiana.

The town of Indianapolis conducted its affairs pursuant to the general laws of the state until 1832. In this year the town was incorporated and was governed by a board of five trustees.

In 1838, pursuant to a special act of the legislature, Indianapolis was re-incorporated and placed in the hands of its first town council composed of a president and six members.

The common council continued in a large measure to control the affairs of Indianapolis as a town and as a city under various so-called charters or grants of the legislature until 1891.

Under a special act of the legislature of 1891 for the city of Indianapolis, a somewhat different form of government was estab-

lished. While the council continued to exercise broad control over the city's affairs, various executive departments of the city were provided, such as Public Works, Public Safety, Public Parks and Public Health, conducted by boards appointed by the Mayor. These boards were granted specific powers and duties concerning the city's business previously exercised by the council through committees subject, however, in some cases to approval of the council in all matters of expenditure of money and appropriation of funds by the council.

For some time prior to 1891 the City of Indianapolis was divided into 25 wards represented by 25 ward councilmen. Their term of office was two years and they were eligible for re-election. At this time there was also a separate body operating in conjunction with the council called the Board of Aldermen, composed of ten Aldermen, representing five Aldermanic districts, two being elected from each district.

Under the 1891 act the Board of Aldermen was abolished and a common council of 21 members was established. Fifteen members were elected to represent 15 wards and six members were elected to represent the city at large.

This form of council continued to exist in Indianapolis under the general cities and towns act of 1905. The act of 1905, while often referred to as the Indianapolis Charter, is very largely a re-enactment of the 1891 Indianapolis charter, modified to make the Indianapolis system applicable to all classes of cities of the state. The 1905 law increased the term of Mayor and councilmen to four years and prohibited re-election.

In 1909 a novel councilmanic law for Indianapolis alone was passed by the legislature. This law limits the number of councilmen to nine. The law provides for the nomination by each party of six candidates, one from each of six councilmanic districts. In the election all of the voters of the city may vote for any nine candidates and the nine receiving the highest number of votes are elected. This law insures a minority representation in the Council of at least three members. In 1949 the legislature amended the statutes to permit councilmen to succeed themselves.

January 13, 1965

TO: THE CITY CLERK AND THE COMMON COUNCIL
OF THE CITY OF INDIANAPOLIS

I hereby veto General Ordinance No. 121, 1964. I am deeply sympathetic with the desire of the members of the Indianapolis Fire Department for shorter hours, however; any such proposal should be considered and submitted along with the general budget ordinance for 1966 since it will have a great impact on such budget.

Further consideration should be given to methods for putting shorter working hours in effect without substantially increasing the budget.

JOHN J. BARTON,
Mayor

COMMUNICATIONS FROM COMMISSION ON HUMAN RIGHTS TO MEMBERS OF THE COUNCIL

MEMORANDUM

January 27, 1965

From: Commission on Human Rights

To: City Council

Subj.: Expiration of Commissioners' terms

Gentlemen:

On January 27, 1965, the appointive terms of Commissioners Merrill Cohen, Dr. Laurence T. Hosie and Mrs. David Cook will expire. All three of these persons were appointed originally by the City Council and have given most generously of their time and energy to the work of the Commission. Because of this, and because of the important projects of the Commission in which they are presently playing key roles, I heartily recommend their reappointment for another three-year term.

I would also like to remind the Council of the Commission's need to bring its membership up to its full allotted strength of 25 members. There are presently 3 vacancies on the Commission which are the prerogative of City Council to fill. In this regard, I hope you will recall Mrs. Edna Johnson and Mrs. G. Barron Mallory, whose names we recently submitted for your consideration, as well as any other per-

Dear Angie:

Thank you very much for sending me the copy of the resolution passed by the City Council of Indianapolis on March 15, supporting President Johnson's proposals to safeguard the lives and protect the rights of persons seeking to register and to vote. This expression of confidence in the President is very gratifying to me.

At my first opportunity, I intend to call it to the attention of my colleagues and ask for its printing in the Congressional Record. The last three or four days I have been occupied almost full time working in the Judiciary Committee on the Voting Rights bill. I believe it will be a stronger measure as it comes from the Committee and that it will receive overwhelming support in the Congress.

With kindest regards,

Sincerely,

BIRCH BAYH
United States Senator

On motion of Mr. Kuykendall, seconded by Mr. Brydenthall, the Council recessed at 7:49 P.M.

Dear Mr. President:

At the last meeting of the Common Council of the City of Indianapolis, held April 19, 1965, a resolution was passed that a letter be written to the President of the United States thanking you for visiting

Indiana to examine the tornado destruction which struck our state on April 11, 1965.

We in Indianapolis were particularly fortunate in that the storm missed the City. We are, however, greatly concerned with the conditions of our neighboring Hoosiers to the north. We deeply appreciate your consideration for the people of Indiana in taking time from a busy schedule to visit the tornado area and in urging the Federal Government to assist our local authorities with the work of reconstruction.

Respectfully yours,

Common Council of the
City of Indianapolis
Joseph C. Wallace, President

On motion of Mr. Kuykendall, seconded by Mr. Deluse the Council recessed at 7:50 P.M. for Committee Hearings.

The Council reconvened at 8:55 P.M.

President Wallace asked the Clerk to read Committee Reports.

Any broken globes or reflectors shall be replaced as soon as practicable after the breakage is discovered.

The City's Police Department will report to the Company, as soon as practicable, all outages observed or known by the members of said Department. The Company shall maintain a record of all outages observed or known, stating the number and locations of any lights extinguished or not burning, and the time when each light was reported extinguished or not burning and the time the light was relighted. Said record shall also state the cause, if known, of each said light being extinguished or failing to burn.

To adjust the cost of lighting service to the City for outages which occur each month during the term of the contract, the Company shall credit on its monthly statement to the City for such lighting service a sum equal to two and two-tenths cents (2.2¢) per light for each light in service during said month.

When by reason of any order or requirement of the Federal Government, or other duly authorized authority, the use of electric current for street and park lighting is limited or prohibited, or street and park lighting is prohibited in toto or for any given number of lamps, then no payment shall be made by the City of Indianapolis for such lamps as are not burning during the period of the order. If the order of the government, or other authority, limits and restricts lighting during certain hours of the night, the payment under the contract shall be adjusted upon a basis to be agreed upon by the City and the Company, or determined by the Public Service Commission of Indiana.

9. JOINT USE OF POLES AND CONDUITS:

The Company, in order to avoid multiplicity of poles and conduits, so far as it is safe and practicable and not in conflict with any restriction of any governmental authority or order of the Public Service Commission of Indiana, shall, upon written request of the Board, permit joint use of all or any of its poles and conduits, in any park, parkway, boulevard, bridge or other public place, by the City for street signs and traffic signal control circuits, or by other public utility companies, upon terms mutually agreeable to those affected.

No advertisements or material of any kind shall be permitted on standards, poles, globes and fixtures or any part of any standard or pole owned by the Board or the Company, except such as may be in the opinion of the Board be necessary for safety and traffic control.

The City shall have the right to place and remove street signs on any standard or pole at any time during the life of the contract. The placing and removal of said signs shall be done at the City's expense.

Attachments to the standards, poles and fixtures of the Company shall be made and maintained by the City, at its own expense, in accordance with standard specifications of the Company for doing such work, and such attachments shall be made in such manner as will neither conflict with the use of said standards, poles and fixtures by

the Company nor interfere with the working or use of its wires thereon and/or from time to time placed thereon. The City shall, at its own expense, upon not less than thirty (30) days' advance written notice from the Company, change, alter, improve, repair, renew or remove said attachments in such manner as the Company may direct.

The City shall indemnify and save harmless the Company against any and all damage or loss that may result to the equipment and/or property owned or used by the Company and from and against any and all legal and other expense, claims, costs, losses, suits or judgments for damages or injuries resulting to persons or property by reason of the use or maintenance of City's attachments to the standards, poles or fixtures of the Company, or by reason of negligent acts or omissions of the agents or employees of the City, while engaged in the work of placing, maintaining or renewing attachments on or removing attachments from said standards, poles or fixtures.

In the event it is necessary to replace a pole or poles upon which the City has made attachments under the contract, because of street improvement, or because the pole is deteriorated, or because the load on said pole or poles has become greater than is safe for the pole to support, the City shall, at its own expense, transfer the attachments from the old to the new pole or poles within ten (10) days after being requested, in writing, to do so by the Company.

Use of Company's conduits by the City, as hereinabove set out, shall conform to the standard specifications of the Company for such use, and the use thereof by the City shall not interfere with the use of said conduits by the Company.

The installation and maintenance of any and all traffic signal control circuits in Company's conduits shall be at City's expense.

In the event it is necessary or desirable, in the opinion of the Company, for the City to remove, replace, repair or relocate any equipment installed by the City in Company's conduits, said equipment shall be removed, replaced, repaired or relocated by the City, at its own expense, within thirty (30) days after being requested, in writing, to do so by the Company.

10. SCREENING OF LIGHTS:

Where the screening of lights is deemed necessary by the Board, the Board may, by written order, require the Company to provide and

install screens, provided the Company is compensated in advance for the installed cost of such screens. The City agrees that it shall indemnify and save harmless the Company from any and all claims, demands, losses, suits or judgments for damages or injuries resulting to persons or property by reason of the installation or use of such screens as may be ordered by the Board.

11. SPACE AND EQUIPMENT ON CITY PROPERTY:

When the requirements of the City, or demands on the Company, require space in City buildings or on City property for the installation of transformation equipment, the City will furnish, exclusively for the Company's equipment, subject to special agreements approved by the Board, suitable space to meet the Company's requirements as to location, size and accessibility.

When the transformers and other facilities and equipment required to furnish and supply current for light and power for public buildings, public equipment and other public places are mounted on wood poles, the Company will install, own and maintain the necessary transformers, protective equipment and other facilities and equipment and make the connections to the City's service outlets.

When the transformers and other facilities and equipment are to be placed at ground level, the City shall install the necessary concrete pads and fencing and the Company will furnish, install, own, and maintain the transformers, protective equipment and other facilities and equipment and make the connections to the City's service outlets.

When an underground transformer vault installation is required, the City shall furnish and install the necessary walls and ventilating grating to provide a suitable transformer vault. The Company will furnish, install, own and maintain the necessary transformers, protective equipment and other facilities and equipment, and the City shall install, own and maintain all high voltage cables, conduit and transformer connections between the Company's high voltage lines and the secondary low voltage lines.

When an underground transformer vault installation is required to supply current for customers other than public buildings, public equipment or other public places, the Company shall provide all necessary partition walls and shall furnish, install and maintain all necessary vault equipment, including all primary and secondary lines and connections within the vault, all at Company's expense.

The Company shall supply one meter for each public building installation, except where more than one department occupies a building. In such event a meter must be connected to the wiring for each department, if the Board, in writing, so requires.

The Company shall supply electric service to public buildings for heat, light and power for the twenty-four (24) hours of each and every day during the term of the contract.

12. IMPROVEMENTS IN SERVICE:

The Board shall have the right to require the Company to make use of any apparatus, appliances or devices that are an advancement or improvement in connection with the art or service of street and park lighting over the existing facilities as now or newly installed according to the contract and in use during any part of the term of the contract, whether in the way of economy, increased illumination, safety, improved appearance or otherwise. The Company shall, at the Board's request or as the Company becomes informed thereof, furnish it with detailed information concerning any such apparatus, appliances or devices, including the cost of installation, operation and maintenance, operating characteristics and any other data requested.

The Company shall be entitled to adjust the compensation from the Board so as to properly reflect, during the remaining term of the contract, any increase or decrease in the investment required and any change in operating expenses caused by the new installations or replacements.

The net increase or decrease in the investment and the change in the cost of operation and maintenance shall constitute the basis for the determination of the rates and charges thereafter to be paid by the Board to the Company for the improved or modified service; and the modifications or changes in the rates and charges set forth in Exhibit B attached to the contract, including the addition of any new rate or change, by reason of the improved or modified services, shall be incorporated therein by an amendment or modification of the contract approved by the Public Service Commission of Indiana, or any other body established by law succeeding to the powers now or hereafter exercised by said Commission.

In cases of new additional installations, comparisons will be made with existing facilities and equipment. In cases of replacements, the comparison will be made with the facilities and equipment replaced.

In the cases of replacements, the Board shall and hereby agrees to pay to the Company the original cost of the facilities and equipment replaced less depreciation, plus the cost of removing the facilities and equipment to Company's storeroom, minus any salvage value of the facilities and equipment so replaced. The amount to be paid by the Board to the Company shall be due upon presentation of a bill therefor and shall be payable within thirty (30) days from date thereof.

13. ELECTROLYSIS:

Reasonable provision shall be made and maintained by the Company to protect the pipes, conduits and other property in the parks, parkways, boulevards or other public places, belonging to the City or to any other public utility or any abutting property owners or occupants, from electrolysis caused by current or currents of electricity of the Company.

14. STANDARD OF PERFORMANCE, TESTS AND PENALTIES:

The voltage and amperage supplied to each lamp shall be such as to maintain the lamps according to the standard requirements of the manufacturers.

The Board may at any time request the Company to make tests as to the voltage and/or current supplied to any lamp or group of lamps and the appurtenances thereto, in the presence of a representative of the City; and the next following working day after the making of such tests, the Company shall report to the City the results of such tests.

In case of a dispute between the Board and the Company as to the accuracy of any meter or other instrument used in making tests or measurements of the Company's service, said instrument may be tested either in the City's laboratory, in the presence of a representative of the Company, or in the Company's laboratory, in the presence of a representative of the City, at the option of the Board, or the Board and the Company may agree to have such instruments tested by an outside laboratory of recognized standing.

The City shall indemnify and hold the Company harmless from all injuries and damages to persons or property by reason of said inspections or tests, except such injuries or damages as may be caused by the negligence of the Company.

Whenever tests made by the Company show that the volts or am-

peres supplied to any lamp or group of lamps or the appurtenances thereto have caused the light output to be more than five per cent (5%) below the standard for said lamp or lamps for a continuous period of one-half hour in any night, as evidenced by the readings of graphic recording voltmeters, ammeters or other devices, then and in that event the Company shall deduct from its bill a sum equal to ten cents (10¢) per night for each lamp tested.

The deductions to be made for low amperage or voltage, under the provisions of this section, are not to be treated as a penalty but as liquidated damages for failure to perform the contract.

15. VOLTAGE AND CHARACTER OF SERVICE:

The Company shall specify the voltage and character of the electric service to be supplied, and it may, at any time thereafter, change the characteristics of the service if it deems such change necessary to safeguard a regular and interrupted supply of electricity or to better the conduct of its business. It is agreed, however, that the Company will give the City reasonable notice of such contemplated change, and the City will adapt its apparatus accordingly.

16. TAXES AND ASSESSMENTS:

Any extra expense incurred by the Company in the performance of the contract, due to any future laws or ordinances, or due to any existing or future special tax or sales tax levied on the Company by the United States Government, State of Indiana, or any division or divisions thereof, for service supplied under the contract, shall be assumed by the City, providing such assumption is not contrary to law; and any reduction in expense which may affect the Company in the performance of the contract by reason of any of the conditions stated above shall be credited to the City under the contract.

17. PERFORMANCE BOND:

The Company, at the time of signing the contract, shall furnish a bond in the sum of Fifty Thousand Dollars (\$50,000.00) with surety to the approval and satisfaction of the Board, conditioned that the Company shall perform the contract according to the terms thereof and according to these specifications. Said bond shall extend for the full term of the contract, but the Company shall furnish and deliver a new bond whenever the surety or sureties on the bond then existing shall be deemed by the Board to be insufficient and unsatisfactory.

Mr. Brydenthal introduced Special Resolution No. 12 on Inter-Loop Highway and moved for its adoption.

Mr. McGill seconded the motion.

SPECIAL RESOLUTION NO. 12, 1965

RELOCATION & REDESIGN OF INNER-LOOP AND PART OF
INTERSTATE I-65

WHEREAS, there has been considerable discussion and controversy concerning the proposed design and route of the so-called North West portion of Interstate Highway I-65 and of the inner-city loop; and

WHEREAS, various alternatives to the location and design proposed by the State Highway Department have been submitted by civic groups and most recently a group of citizens has offered a modified plan which represents the consensus of the persons and organizations opposed to the plan sponsored by the State Highway Department; and

WHEREAS, it is of the utmost importance to adopt and implement a plan which will be in the best interests of the citizens of the City of Indianapolis and will contribute to, and enhance the long-range beauty of the City and the well-being of the general community; and

WHEREAS, President Johnson has formulated a national policy for creating urban beauty, retaining the natural beauty of the Nation, and developing a more beautiful America and has stated that in implementing this task, the Federal Government must have the enthusiasm, concern and cooperation of every level of government — state, county, city and precinct; and

WHEREAS, Congressman Andrew Jacobs, Jr., endorsing the President's position, has pointed out that decisions made now with respect to location and design of Indianapolis inner-city highways will determine whether succeeding generations will remember us with gratitude or sorrow, and

WHEREAS, the experience of other cities, such as Philadelphia and Pittsburgh, has indicated that the Federal Government will cooperate fully in the location and design of highways in a manner which will preserve the natural beauty of the terrain of the particular city and has further indicated that the Federal Government will assist in meeting any additional cost caused by construction of expressways below street level, rather than elevated highways built on earth embankments or stilts, and that such cost is offset

in full measure by the lasting aesthetic and economic advantages gained thereby; and

WHEREAS, it is clear from the statements of federal highway officials who participated in the recent White House Conference on natural beauty and from the statement of other experts that the whole concept of highway construction through urban areas has been radically modified in the last few years; and

WHEREAS, depressed design for the inner-city loop and the North West leg of I-65 was recommended by H. W. Lochner Co., consultants to the Indiana State Highway Department, as early as 1957 and that, therefore, the State Highway Department already has available to it information, studies and data showing the feasibility of depressed design for the inner-city loop and the North West leg of proposed I-65; and

WHEREAS, the re-location and depressed design as proposed in the modified plan referred to above will greatly benefit the people, the City and the persons who will use the highway and will save major existing recreational areas; and

WHEREAS, the re-location of I-65 as proposed in the modified plan referred to above will result in substantial savings to the taxpayers of the City of Indianapolis and the State of Indiana; and

WHEREAS, this common council has the obligation to make appropriations for inter-connecting streets and thoroughfares which will cost the taxpayers of Indianapolis in excess of 20 million dollars and is, therefore, obligated to speak out strongly and forthrightly on this matter, and

WHEREAS, the change in design and location of I-65 and the inner-city loop can be accomplished within the time prescribed by the applicable laws, rules and regulations; and

WHEREAS, this Common Council believes it imperative that an official stand be taken by representatives of the citizens of the City of Indianapolis with respect to this matter:

NOW, THEREFORE, BE IT RESOLVED that the Common Council of the City of Indianapolis hereby approves and commends the

modified plan for the location and design of the North West portion of I-65 as it enters the City of Indianapolis, and the depressed design for the inner-city loop, all as set forth in a memorandum dated September 20, 1965, and hereby officially asks the Mayor of the City of Indianapolis, the Governor of the State of Indiana, and the Indiana State Highway Department and all other state, county, municipal and local officials to lend their efforts to bring about the adoption of the modified plan in order that the physical attractiveness of the City be retained and enhanced, displacement of numerous families be avoided and substantial savings be effected on behalf of the State, County and City.

Mr. Deluse moved the Resolution be tabled until the next meeting December 6th, 1965. Mr. Egenes seconded the motion of Mr. Deluse.

The motion to table until December 6th, 1965 passed on following roll call:

Ayes 6, viz: Rev. Cummings, Mr. Deluse, Mr. Egenes, Mr. Hasbrook, Mr. Moriarty and President Wallace.

The above provision as to claim checks shall not apply where cars are stored on a weekly or monthly fee basis or some memorandum is given in writing to the person storing his car stating the weekly or monthly arrangement and showing the name and address of the operator of the storage or parking place.

Section 9. Barriers. Persons operating open parking places shall keep the same enclosed with a proper or suitable fence, wall or other barrier of not less than thirty inches in height so that motor vehicles cannot be removed from such place except at the regular established entrances and exits. The materials, designs, location and construction of such fence, wall or other barrier shall be approved by the Traffic Engineer for the City of Indianapolis, and shall be in accordance with standards set up by the said Traffic Engineer.
